BEADS AND COLLARS

Sutures with beads and collars can be supplied upon request

BONE WAX

Description	Size	Code
Sterile Bone Wax	2.5 Grams	LPB25

- ❖ Sterile Bone Wax is a mixture of white Bees wax, Paraffin and Isopropyl Palmitate.
- ❖ Bone Wax may be used for the control of bleeding from bone surfaces. Bone Wax achieves local haemostasis of bone by acting as a mechanical (tamponade) barrier.
- ❖ Bone Wax is bio-chemically inert and minimally absorbable.
- ❖ Bone wax is supplied in boxes of 12
- ❖ Sterilised by Gamma Irradiation

MONOFILAMENT POLYPROPYLENE MESH

Description	Size	Code
Polypropylene Mesh	30 x 30cms	LMM3030
Polypropylene Mesh	15 x 15cms	LM1515

- ❖ Sterile non – absorbable monofilament Polypropylene Mesh is knitted by a process that interlinks each fibre junction and provides elasticity in both directions. This bi-directional extendable property allows adaptation to various stresses encountered by the body.
- ❖ Polypropylene Mesh is chemically inert and hydrophobic.
- ❖ Polypropylene Mesh is flexible and strong and is intended for use where permanent or extended tissue support is required.
- ❖ Polypropylene Mesh is supplied 1 sheet per box
- ❖ Sterilised by Ethylene Oxide
